ROARING ROCKETS

5,4,3,2,1, Lift! Blast off today as we get to grips with aerodynamics, forces of flight and explore the science behind magnificent flying machines! Your junior rocket scientists will design, build and send rockets up into the clouds. So many things to make and create in this all-encompassing popular day!

CRAZY CHEM-WORKS

We all love chemistry; changing colours, bubbling potions and things that go BOOM! This day will be full of Mad Mixtures that give us unexpected surprises. A day to discover all kinds of powerful potions and what happens when we mix them up and pull them apart again. Find out what really happens in a Mad Science laboratory and use chemical indicators to explore the composition of different substances. Safety goggles definitely required as these experiments are bound to get a reaction!!!

JURASSIC JOURNEY

Journey with us along our fabulous coastline, experiment with flood defences in our water rippling activity. Plus, today is the day for all Junior Palaeontologists!!! Time to dig for funky fossils and dinosaur bones – what will you discover? Make your own t-rex tooth too take away with you as we study our Carnivores and Herbivores of the dinosaurs that roamed our land millions of years ago!

BRILLIANT BUGS!

Time to walk on the wild side today as we explore the world of teeny tiny creatures. Insects, worms and things that squirm! Look through microscopes, magnifying glasses, intriguing insect's habitats, insect defence systems plus time to go outside and see what we can find, let's get classifying, did we find an insect?

TO INFINITY AND BEYOND

Is there life on Mars? Today's the day we journey through our Solar System on a planetary exploration as we get to grips with astronaut training, space station creating, along the way we will discover awesome asteroids, supersonic stars, crazy comets and make your own take wind-up home space shuttle.
